

Base Camp™ Release Notes

Version: V1.1.8
Release date: 11-May-2022

Improvements:

- Fixed an issue that prevented the profile sequence from working as intended on Everest (requires firmware 54.24.18 or newer)
- Fixed an issue that prevented the profile sequence from working as intended on Everest 60 (requires firmware 1.24 or newer)
- Fixed an issue that prevented profile switching from working as intended when linked to an executable

Known issues:

- Profiles may get deleted during the update process. Please export your profiles first, then update Base Camp, and re-import your profiles to avoid losing them
- In-app update from V1.0.26 or older may not work. Please export your profiles, uninstall Base Camp, install the latest version manually and re-import your profiles
